PROFILE

Passionate and purpose-driven Computer Science student with strong technical, creative, and leadership skills. I bring a proven record of academic excellence, team coordination, and impactful real-world project development. I thrive at the intersection of technology, creativity, and social good, aiming to contribute to my country's digital transformation. Motivated by lifelong learning, I'm committed to building practical, innovative solutions that bridge theory and real-world needs.

WORK EXPERIENCE

Team Leader & Web Developer

2024 - PRESENT

Uni-Kasher Startup (DDU BTIC Incubation Center)

- Co-founded a financial transaction system for Ethiopian universities to reduce corruption, simplify payments, and ensure financial transparency.
- Coordinated team workflows using Agile and presented ideas to competition judges and university stakeholders.

Graphics Designer

2021 - Present

Media Club

- Designed logos, banners, and digital flyers for multiple organizations.
- Led the graphics design team and trained new members through structured tutorials.
- Played a key role in visual branding and public communication during events.

Freelance Developer and Designer

2022 - 2023

Self-initiated Projects

- Designed custom branding assets for small organizations.
- Offered tutoring and mentoring to junior students in programming and design.

EDUCATION

- Strong upward academic trend with distinction in programming, database systems, and software engineering.
- Actively participates in hackathons and academic innovation competitions.
- Member of campus tech and innovation clubs.
